

# Portfolio Token

THE TOKEN THAT INVESTS

[portfoliotoken.net](https://portfoliotoken.net)

## Why Portfolio?

There is one thing a lot of tokens in the crypto world lack; a vision. The internet is full of cryptocurrencies that run off supply and demand alone. The market is full of tokens that hold no purpose and lack any vision for the long term future.

But what if there was a token that had a greater purpose? A token that held a vision for those who wanted to invest in their future.

Portfolio was developed as the first token to bridge that gap. A token that will be backed by interest-bearing assets. Portfolio will change the way we invest for our future. It will change the cryptocurrency world as we know it.

A community driven, assets holding token that pays its profits back to the holders 3X.

**Total Supply:**

775 Trillion

**Marketing & Operations:**

14% - 55 Trillion

**PCSwap Initial Supply:**

630 Trillion

## Tokenomics

Portfolio (PTF) holds a 10% fee for all transactions. 5% of this fee is automatically redistributed to the community, proportional to the tokens that they hold in their wallet. The other 5% is transferred to our Portfolio Investment wallet listed here (0x85ddEEda10f80cb-BEcc090E495fEadC20bC6A454)

When the time is right, 60% of those tokens will be removed from that wallet and exchanged for BNB (another 5% paid to holder) and invested into assets that have promising returns. Another 5% will be burned.

The profits from those investments will then be added into the Liquidity Pool by pairing those profits with the remaining 35% of PTF in the investment wallet and added back into the Liquidity Pool. By constantly adding to the Liquidity pool, we strengthen the longevity and stability of the token.

With Portfolio, the longer you hold, the longer you will earn because our acquired assets will continue pay any profits gained back into the tokens economy.

## Asset Allocation

Our initial asset purchases will be growing cryptocurrencies, Bitcoin and Ethereum. Purchasing these currencies at a low and redistributing profits back to the Portfolio holders as they rise, month over month. With community involvement and engagement, our portfolio profile can expand into other cryptocurrencies that our community believes has strong potential for growth.

Once we have a solid investment of currencies, Portfolio will invest with REITs (Real Estate Investment Trust) companies. Measured by the MSCI U.S. REIT index, the five-year return of u. S. REITs was 15.76% in June 2020.

# Road Map

## Short Term

- Publish Smart Contract on BscScan
- Verify Contract
- Launch May 2021
- Start regularly scheduled AMAs
- Broaden awareness with marketing
- Start purchasing BTC & ETH assets to hold
- Logo added to TrustWallet (2500 holders)

## Medium Term

- First profits paid back to LP from assets
- Get added to Blockfolio, CMC & Coin Gecko
- TechRate audit performed
- Get Grant Cardone to be an Influencer
- Start PortfolioToken, LLC
- Launch new website
- Start working Exchange Listings

## Long Term

Become a well known and established Token, holding profitable assets in our PORTFOLIO to return profits to our community regularly
